Geometry Unit 8: Year-to-date Regents review

Bronx Early College Academy

Christopher J. Huson PhD

13 February 2023 - 17 February 2023

8.1 Triangle angles 13 February

8.2 Transversals and isosceles triangles 14 February

8.3 Midpoint, segment partition 16 February

8.4 Area, volume, density, solids 27 February

8.5 Analytic geometry graphing 28 February

8.6 Analytic geometry slope applications 2 March

8.7 Analytic geometry distance applications 6 March

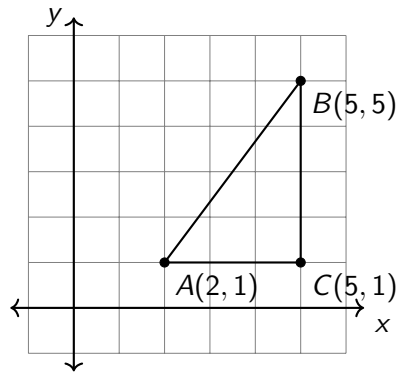
Learning Target: I can calculate triangle angles

HSG.CO.A.5 Congruence transformations 8.1 Monday 13 February

Do Now

1. Review your Jumprope grades
2. Right $\triangle ABC$ with $m\angle A = 53°$. Find $m\angle B$

Lesson: Internal and external triangle angle measures
Homework: Complete the classwork practice, Deltamath problem set



Triangle angle theorems, internal and external angle measures

Find this information in your notebook (October 24th)

Triangle sum theorem $\text{m}\angle A + \text{m}\angle B + \text{m}\angle C = 180^\circ$

External angle theorem $\text{m}\angle A + \text{m}\angle B = \text{m}\angle BCD$

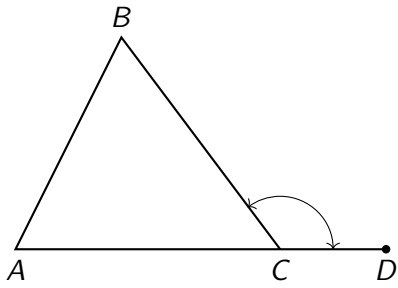
Linear pair angles that make a straight line, 180°

Supplementary angles that sum to 180°

Complementary angles that sum to 90°

Interior Inside, internal

Exterior Outside, external

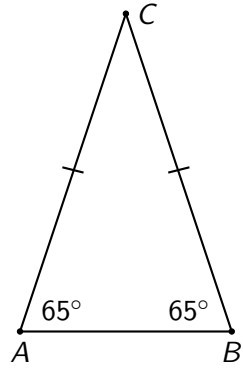


Learning Target: I can work with parallel lines

HSG.CO.A.5 Congruence transformations 8.2 Tuesday 14 February

Do Now: Isosceles $\triangle ABC$ has two angles measuring 65°. Find the measure of the 3rd angle, m$\angle C$.

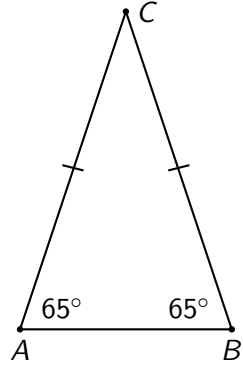
Lesson: Isosceles triangles, parallel lines and transversals
Homework: Complete classwork, Deltamath assignment



Isosceles base theorem: Sides $\cong$ *iff* angles $\cong$

Isosceles $\triangle ABC$ has two angles measuring 65°. Find the measure of the 3rd angle, m$\angle C$.

$65^\circ + 65^\circ + x = 180^\circ$
$130^\circ + x = 90^\circ$
$x = 30^\circ$



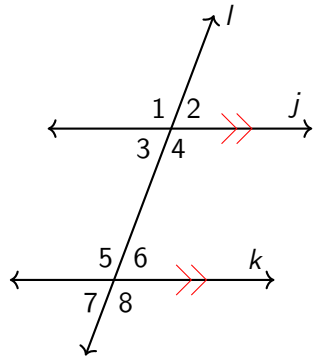
Two parallel lines and a transversal intersecting them

Vertical angles at intersections, opposite angles are $\cong$

Corresponding angles are congruent ($\angle 2 \cong \angle 6$)

Alternate interior angles inside parallels, not on the same side, are congruent ($\angle 3 \cong \angle 6$)

Same side exterior angles outside the transversal, on the same side, are supplementary ($m\angle 1 + m\angle 7 = 180°$)

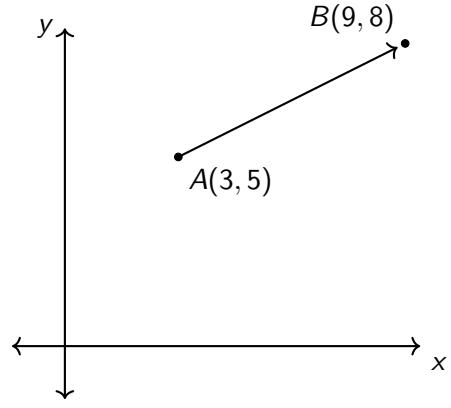


Learning Target: I can partition a line segment

HSG.CO.A.5 Congruence transformations 8.3 Thursday 16 February

Do Now:
Given $T_{+a,+b}$ maps $(3,5) \rightarrow (9,8)$
Find a and b

Lesson: Ratios, partitioning a line segment
Homework: Complete classwork, Deltamath assignment

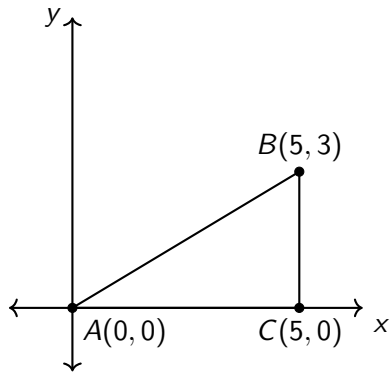


Learning Target: I can calculate area and volume

HSG.CO.A.5 Congruence transformations 8.4 Monday 27 February

Do Now: Find the volume of the box $ABCD$.
length $= 5$ cm
width $= 3$ cm
height $= 10$ cm

Lesson: Area, perimeter, volume, density, solids, cross sections
Homework: Complete classwork, Deltamath assignment

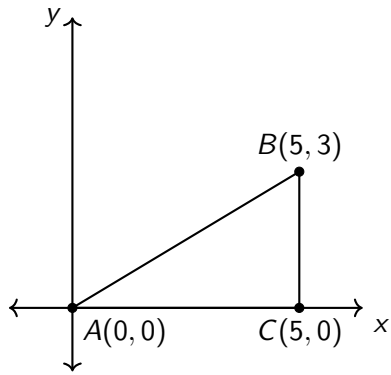


Learning Target: I can graph linear equations and systems

HSG.CO.A.5 Congruence transformations 8.4 Monday 27 February

Do Now: Find the volume of the box $ABCD$.
length $= 5$ cm
width $= 3$ cm
height $= 10$ cm

Lesson: Area, perimeter, volume, density, solids, cross sections
Homework: Complete classwork, Deltamath assignment

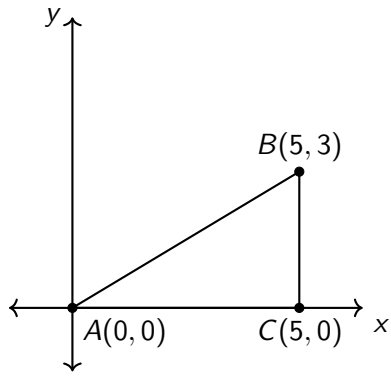


Learning Target: I can use slope to solve problems

HSG.CO.A.5 Congruence transformations 8.4 Monday 27 February

Do Now: Find the volume of the box $ABCD$.
length $= 5$ cm
width $= 3$ cm
height $= 10$ cm

Lesson: Area, perimeter, volume, density, solids, cross sections
Homework: Complete classwork, Deltamath assignment



Learning Target: I can calculate distance in context

HSG.CO.A.5 Congruence transformations 8.4 Monday 27 February

Do Now: Find the volume of the box $ABCD$.
length $= 5$ cm
width $= 3$ cm
height $= 10$ cm

Lesson: Area, perimeter, volume, density, solids, cross sections
Homework: Complete classwork, Deltamath assignment
