

9.1 Classwork: Linear and quadratic graphs

1. A linear function f is graphed below.

(a) Write down it's slope.

$m =$

(b) Write down it's y -intercept.

$b =$

(c) Write down the equation of the line.

(d) State the coordinates of the point Q .

2. Write the linear equation $y - 1 = \frac{1}{2}(x + 8)$ in the form $y = mx + c$.

3. Given $f(x) = (x - 1)(x + 5)$

(a) Sketch the function. Label the vertex as an ordered pair and mark the intercepts with their values.

(b) Expand the function to standard form, $f(x) = ax^2 + bx + c$ where $a, b, c \in \mathbb{R}$.

4. The function $f(x) = -\frac{1}{2}x^2 + 2x$ is shown on the graph.

(a) Write down its vertex as an ordered pair.

(b) Write down its domain and range.

(c) Write down $f(0)$.

(d) Write down two solutions to $f(x) = 0$.

5. Consider the function $f(x) = x^2 + 4x - 12$. (graph it to answer the questions)

(a) This function can also be written in the form $f(x) = (x - p)^2 - 16$.
Write down the value of p .

(b) The graph of f has two solutions for $f(x) = 0$. Write down the solutions (or roots, zeros) of the function.

(c) Hence, write down the function in factored form, $f(x) = (x - a)(x - b)$.

6. Given two functions, a quadratic function $f(x) = 0.8x^2 + 3.2x - 2$ and a linear function $g(x) = 0.8x + 1.2$.
- (a) Graph the parabola $y = f(x)$, marking the y -intercept and the vertex as an ordered pair.
- (b) Find the coordinates of the two intercepts with the x -axis, the roots or zeros of $f(x)$.
- (c) Plot the linear function, $y = g(x)$. Mark and label the two intersections of the two functions $f(x) = g(x)$ as ordered pairs.

7. A dart is shot vertically upwards.

The path of the dart can be modelled by the equation $h(t) = 8t - t^2$ where $h(t)$ is the height in meters of the dart after t seconds.

- (a) Plot a graph of this equation and hence sketch it below, showing the coordinates of the vertex and axes intercepts.
- (b) Find the t -intercepts and explain what these values represent.
- (c) Find the equation of the axis of symmetry, and state what this tells you in the context of the problem.
