

1.2 Homework: Vocabulary checklist (should all be in your notebook)

What do they mean and what is the standard notation?

1. How do we describe “undefined terms”?
 - Point
 - Line
 - Plane
2. What are the basic geometry terms involving points, lines, and line segments?
 - Collinear set of points
 - Non-collinear
 - Coplanar
 - Line segment
 - Distance between two points (on the real number line)
 - Length/measure of a line segment
 - Congruent segments
3. What are the basic geometry terms involving rays and angles?
 - Rays
 - Opposite rays
 - Angle
 - Straight angle
 - Right angle
 - Obtuse angle
 - Acute angle
 - Interior/exterior of an angle
