

Name:

6.10 Quiz corrections: Slope-intercept form of linear equations

8.F.A.3

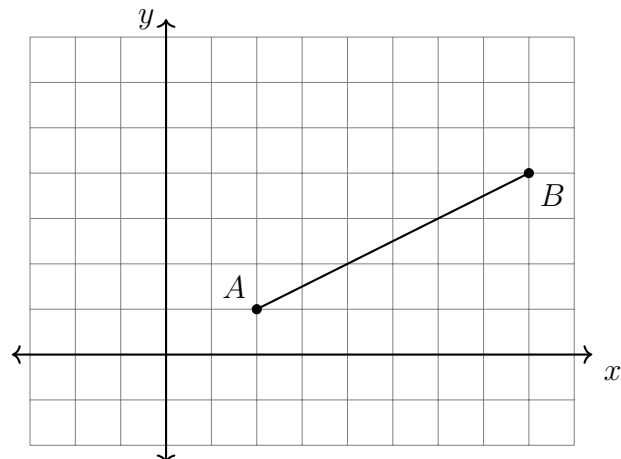

1. Two lines are shown in the graph below.
 - (a) Write down their equations in slope-intercept form.
 - (b) Write down their intersection as an ordered pair.
 - (c) Show that the lines are not perpendicular by taking the product of their slopes.

The midpoint formula

HSG.GPE.B.6

2. Write down the midpoint formula.
3. In the diagram below, \overline{AB} has endpoints with coordinates $A(2, 1)$ and $B(8, 4)$. Find the coordinates of the midpoint M of \overline{AB} . Mark and label it on the graph.

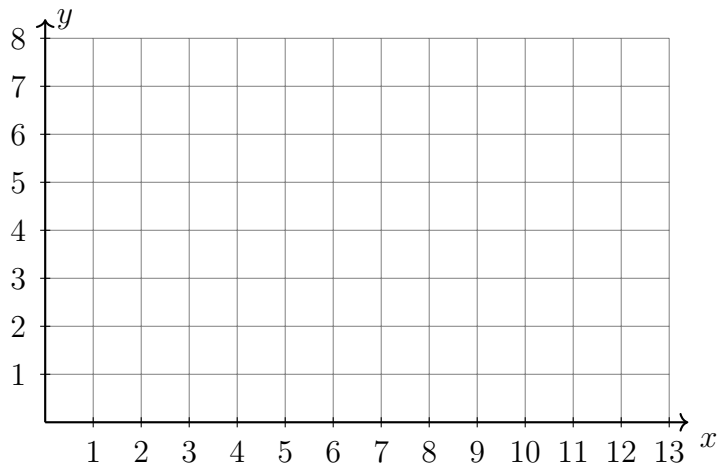

The distance formula

4. Write down the distance formula.

5. What is the length of \overline{PQ} if $P(2, 1)$ and $Q(10, 7)$?

6. Graph and label $\triangle ABC$. Calculate the lengths of its sides. $A(0, 0)$, $B(12, 5)$, $C(12, 0)$.

7. Write the linear equation $4x + 2y = 10$ in the form $y = mx + b$.
