

Name:

5.3 Classwork: Distance formula

1. Do Now: Use a centimeter ruler to measure the triangle side lengths.

2. What is the length of \overline{PQ} if $p(3, 1)$ and $Q(9, 1)$?

Note: The formula for distance is $d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$

3. Graph and label $\triangle ABC$. Calculate the lengths of its sides. $A(1, 2)$, $B(9, 8)$, $C(9, 2)$.

(a) $AC =$

(b) $BC =$

(c) $AB =$

2

4. Graph and label $\triangle ABC$. Calculate the lengths of its sides. $A(0,0)$, $B(12,5)$, $C(12,0)$.

5. Graph and label $\triangle CAT$. Calculate the lengths of its sides. $C(2,1)$, $A(12,6)$, $T(12,1)$. Leave the result as a (simplified) radical if necessary, not a decimal approximation.

6. The base of a right triangle is 4 centimeters long and its hypotenuse is 5 cm. Find its height, x cm.

Name:

7. Graph and label $\triangle CAT$. Calculate the lengths of its sides. $C(1, 2)$, $A(10, 8)$, $T(10, 2)$.

8. The base of a right triangle is 8 centimeters long and its hypotenuse is 10 cm. Find its height, x cm.
