## 6.7 Classwork: Systems of linear equations

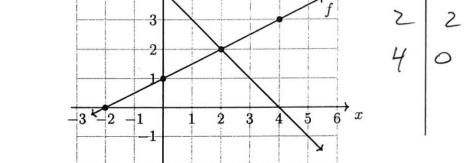

HSG.REI.C.6

g(x)

- 1. Two lines are graphed below.
  - (a) Complete the T-tables for each.
  - (b) Write down the equations for each.

f(x) $\boldsymbol{x}$ -20

- 2. The line l is graphed at right.
  - (a) Write down the line's slope.

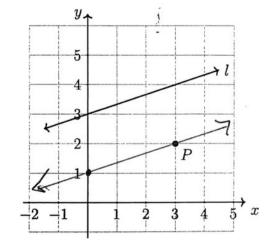

$$m = \frac{1}{3}$$

(b) Write down it's y-intercept.

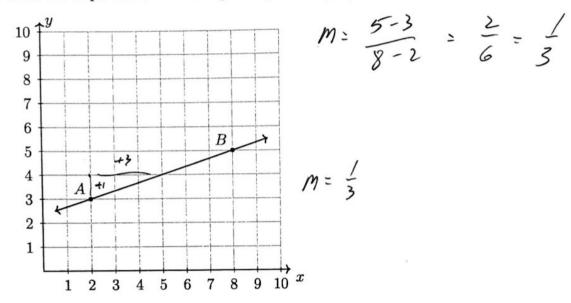

(c) Write down the equation of the line.

(d) Draw a line parallel to l through point P. (use a straight edge for full credit)

3. Find the slope of the line through the points A(2,3), B(8,5).

4. Find the slope of the line through the points (3, -2) and (-3, 2).

$$M = \frac{2 - (-2)}{-3 - 3} = \frac{4}{-6} = -\frac{2}{3}$$

5. Write the linear equation  $y-5=\frac{2}{5}(x-10)$  in the form y=mx+c.

6. Is the point (-4,1) on the line  $y=\frac{1}{2}x+3$ ? Support your answer algebraically.

Time 
$$y = \frac{1}{2}x + 3$$
? Support your answer algebraicany.
