1.4 Homework: Segments
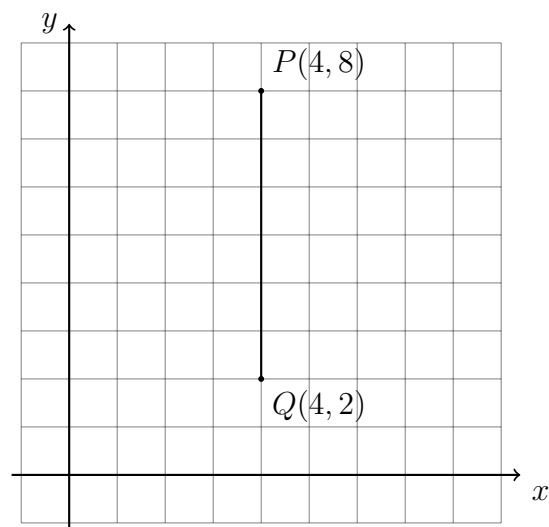

1. Do Now: The vertical line segment $\overline{PQ}$ is plotted on the coordinate plane with $P(4,8)$ and $Q(4,2)$.

   Find the length PQ.

   Show the calculation, including the absolute value bars. Count on the grid as a check. (leave marks)

2. The horizontal line segment $\overline{RS}$ is plotted on the coordinate plane with $R(1,3)$ and $S(5,3)$.

   Find the length RS.

   Show the calculation.
