

Classwork: Probability formulas, Venn diagrams

1. Given events A and B with $P(A) = 0.5$, $P(B) = 0.8$, $P(A \cap B) = 0.4$.
- (a) Completely mark the Venn diagram with probabilities for each area.

- (b) Write down $P(B')$.
- (c) Write down $P(A \cap B')$.
- (d) Find $P(A \cup B)$. (Do not just write a value. “Find” means you must show the substitution of values into the appropriate formula.)
- (e) State whether events A and B are independent. Justify your answer.
- (f) Find $P(A|B)$. (again, show the substitution of values into a formula.)

2. The events A and B are independent with $P(A) = 0.6$ and $P(B) = 0.4$.

(a) Find $P(A \cap B)$.

(b) Complete the data table of probabilities, including the totals column and row.

	A	A'	
B			
B'			

(c) Find $P(A \cup B)$.

(d) Find $P(B|A')$.

3. The events A and B are mutually exclusive with $P(A) = 0.4$ and $P(B) = 0.3$.

(a) Write down $P(A \cap B)$.

(b) Find $P(A' \cup B)$.
